Profile

Network Engineer at Reliance Jio Platforms Limited with a B.E. in Computer Technology and hands-on experience deploying, managing, and troubleshooting large-scale enterprise networks. Skilled in Routing & Switching, Wireless LAN, Layer 2/Layer 3 technologies, and automation using Python to improve operational efficiency and ensure high network availability.

Skills

Technologies:

Switching, Wireless, Routing, STP, RSTP, VPC, QOS, EtherChannel, ARP, ACL, VRF, 802.1x, MAB, SNMP, AAA, VSX, VSF, Stacking, HSRP, VRRP, 802.1q, DNS, DHCP, BGP, OSPF, MPLS, VXLAN, VSS, VTP, BLE, Fabric Extender (FEX), Virtual Device Context (VDC).

Platforms and Tools:

Cisco, Aruba, Nexus, Meraki, ISE, Wireless Controller, Cisco Prime Infrastructure, Mobility Master, AirWave, ClearPass, Firewall, Wireshark, iBwave, Ekahau, DNAC, Putty, NNMI, Jio Wave, Meraki Dashboard.

Devices:

• WLC

9800, 8540, 8510, Aruba 7280, WISM.

• Switch

Cisco Catalyst 9K, 6K, 4K, 2960, Aruba 8325, 8320, 6400, 6300, Nexus 9K and 7K, Meraki MS series.

• Access Point

Cisco 9K, 1702I, 3702I, Meraki MR series, Aruba 555.

Automation and Scripting:

Python, SQL, Ansible, HTML, JavaScript, CSS, C++, Excel.

Education

B.E - Computer Technology

Priyadarshini College of Engineering, Nagpur.

08/2019 – 06/2023 | Nagpur

Rashtrasant Tukadoji Maharaj Nagpur University.

SGPA : 8.50

SSC and HSC

Ordnance Factory Higher Secondary School, Chanda.

06/2016 – 02/2019 | Bhadravati

Maharashtra State Board Higher Secondary Education.

Achievements

- Star Employee Award 2025 (Jio Platforms Limited)
- Gold Medalist - Academics (Priyadarshini College)

Professional Experience

Network Engineer - Enterprise Network and security.

Reliance - Jio Platform limited

12/2023 – present | Navi-Mumbai

- Advanced troubleshooting of LAN, WLAN, and AAA-related issues, ensuring rapid incident resolution and adherence to service level agreements (SLAs).
- Diagnosed and resolved enterprise wireless connectivity issues, including client onboarding failures, roaming disruptions, RF interference, and authentication challenges.
- Troubleshoot complex network infrastructure, resolving issues related to VLANs, STP, wireless controllers, access points, routing protocols, and network services.
- Investigated and resolved AAA authentication, authorization, and accounting issues involving TACACS+, RADIUS, and identity-based access services.
- Successfully delivered multiple network deployment, migration, and upgrade projects involving enterprise switching, routing and wireless infrastructure.
- Improved network reliability through proactive capacity planning, RF planning, wireless site surveys, heatmap analysis, performance optimization and the implementation of resilient network designs.
- Worked closely with OEM TAC engineers to perform advanced troubleshooting, root cause analysis, and resolution of critical network incidents.
- Served as a technical mentor for junior network engineers, facilitating knowledge transfer, troubleshooting guidance, and skill development across networking technologies.
